2021 ASSEMBLY JOINT RESOLUTION

Relating to: Wisconsin election reform and reclaiming the electoral ballots for President and Vice President that were fraudulently certified.

Whereas, the Wisconsin Supreme Court stated in Trump v. Biden, 2020 WI 91, “On March 25, 2020, the Dane and Milwaukee County Clerks issued guidance on Facebook suggesting all voters could declare themselves indefinitely confined because of the pandemic and the governor’s then-existing Safer-at-Home Order. This court unanimously deemed that advice incorrect on March 31, 2020, and we noted that the WEC guidance . . . provides the clarification on the purpose and proper use of the indefinitely confined status that is required at this time,” which verifies that the Elections Commission gave improper guidance in the 2020 election; and

Whereas, on December 7, 2020, Elections Commissioner Dean Knudson filed a complaint against Meagan Wolfe under Wis. Stat. § 7.70 (5) for the rushed ascertainment of certification of the 2020 election before time for filing an appeal of the recount had passed, and revealed the planned haste to circumvent any further discussion or objection; and
Whereas, the Assembly Committee on Campaigns and Elections has collected nearly 3,000 documents and e-mails with connection to election manipulations by the Center for Tech and Civic Life in five of Wisconsin’s largest cities, and there are five lawsuits in those cities against the Elections Commission; and

Whereas, data experts have studied the historical voter trends based on population growth for both the entirety of the State of Wisconsin and its counties individually, and those studies reveal the normal inverse relationship of data was not present in the 2020 election results, which is a statistical impossibility; and

Whereas, the WisVote database reflects 7.1 million registered voters in a state with a population of 5.8 million and a voting age population of 4.5 million, and the WisVote database is riddled with incomplete and misrepresented data, including thousands of voters with the same phone numbers, addresses, and faulty zip codes, all of which reflects gross negligence in maintaining the database; and

Whereas, grassroots canvassing efforts reveal 200 addresses in 31 counties in Wisconsin that have 200 to 400 registered voters at a single address, and a sampling of 1,000 actual 2020 absentee ballot envelopes from Milwaukee County found 23 percent had questionable addresses; and

Whereas, the Elections Commission voted to do upgrades on Dominion voting machines on June 2, 2021, and, following a press release on August 11, 2021, voicing concerns about the deletion of log file data from those upgrades, the commission voted to allow upgrades to new ES&S voting machines on September 9, 2021 with no reassurances of protecting the data of the 2020 election on older machines, even though it was revealed the upgrades do erase log file data kept on the machine hard drives; and
Whereas, the audit report of the nonpartisan Legislative Audit Bureau identified 44,272 voters who did not provide proper voter identification in the 2020 general election, revealed the mass increase of indefinitely confined voters from 4,505 in 2019 to 169,901 in 2020, and made 30 recommendations for the Elections Commission to rectify their actions; and

Whereas, a total of 50 of the 69 county GOP parties released letters of support or resolutions asking for further investigation into the elections process, showing that over two-thirds of Wisconsin Republicans have no faith in the Elections Commission; and

Whereas, commissioners and staff of the Elections Commission prevented the deployment of special voting deputies to care facilities, as confirmed by the Racine County Sheriff’s Department, which found that on March 12, 2020, the Elections Commission knowingly and willfully directed all 72 county clerks to violate Wis. Stat. §§ 6.84 and 6.875 regarding absentee voting in certain residential care facilities and retirement homes, and the commission’s unlawful direction clearly broke Wis. Stat. § 12.13 (2) (b) (7), which refers to intentionally violating election laws; and

Whereas, the U.S. Supreme Court has found that fraud vitiates and nullifies any contract: Boyce’s Executors v. Grundy (1830) 28 U.S. 210; “Fraud vitiates the most solemn contracts, documents and even judgments.” United States v. Throckmorton (1878) 98 U.S. 61, 64; and

Whereas, the November 2020 Wisconsin general election, as regulated and directed by the Elections Commission, was one of the most haphazard, controversial, and poorly managed elections in state history, shaking citizens’ confidence in fair elections across Wisconsin, and with the culmination of these evidences, prove the
results of the commission’s certification of the 2020 election are considered fraudulent; now, therefore, be it

Resolved by the assembly, the senate concurring, That the accumulated evidence proves the actions taken by the Elections Commission to certify the 2020 presidential election shall be considered fraudulent under Wis. Stat. § 12.13 (2) (b) (7); and, be it further

Resolved, That the Wisconsin Legislature, pursuant to its authority under Article II, Section 1, Clause 2 and the Ninth and Tenth Amendments of the U.S. Constitution, reclaims Wisconsin’s 10 fraudulent electoral ballots cast for Joseph R. Biden and Kamala Harris; and, be it further

Resolved, That the Wisconsin Legislature shall pass legislation with the intention to clean up the WisVote database and create separate servers for active and inactive voters; and, be it further

Resolved, That the Wisconsin Legislature supports a full forensic physical and cyber audit of the 2020 general election, that this full forensic physical and cyber audit should be conducted by an independent and nonpartisan auditing firm approved by the Assembly Committee on Campaigns and Elections, and that this full forensic physical and cyber audit must include the following components:

1. Total examination of voting system machines, including browsers, tabulators, scanners, routers and firewalls, switches, network and out-of-band management cards, internet or network connectivity, network and remote access, remote access applications, software installed or removed on the system, flash drives, thumb drives, event logs, scripts that have been run, the date on which data were last modified and what data were modified, whether during or after the election, systems and security updates, password policies, multifactor
authentication, databases, adjudication records, administrator accounts, and log-in
records.

2. Kinematic examination of all physical paper ballots, including whether
ballots meet industry maximum allowable compliance for out-of-calibration
measurements, ballot thickness to prevent bleed through, types of markers used,
printed ballots, quantity of ballots, ballot trail, voter roll in comparison to ballots,
mail-in ballot standards, and ballot watermarks and dot coding.

3. Physical canvas, including whether county clerks and election employees
and volunteers followed election rules and regulations mandated by their county.

4. Transparency; and, be it further

**Resolved, That** in order to ensure transparency, all such audits shall be
streamed live for public viewing and recorded via security video to be run 24 hours
a day, 7 days a week, until all such audits are complete; and, be it further

**Resolved, That** the Wisconsin Legislature shall pass legislation specifically
intended to secure the integrity of future elections in Wisconsin based on the findings
of the Legislative Audit Bureau investigation, the Assembly Committee on
Campaigns and Elections investigation, and the full forensic physical and cyber
audit; and, be it further

**Resolved, That** the secretary of state of the State of Wisconsin is hereby
directed to forward a proper authenticated copy of this resolution to the President
of the Senate of the United States.

(END)
